

# Machine construction and assembly

The plant occupies an area of 54,000 square meters, of which 6,700 are covered, and is equipped with special lifting devices, as well as specific equipment for mechanical, hydraulic, electrical and electronic assembly. We are able to build components, groups or complete machinery for the following sectors:

**Machine Tools**  
**Automation**  
**Automotive**  
**Packaging**  
**Logistic**

**Mechanical parts**  
**+**  
**Machine construction**  
**=**

**MECMONT** 

## Mechanical Workshop MecMont

Via La Piana, 3 - 41045 Montefiorino - Modena - Italy - VAT No. 02608510364  
Tel. +39 0536 960187 - [www.mecmont.it](http://www.mecmont.it) - email: [info@mecmont.it](mailto:info@mecmont.it)

**MECMONT** 

**Precision mechanics**

**5-axis centres**  
to produce the most complex  
parts

**Horizontal centres**  
for series machining

**Vertical centres**  
for machining up to 6000 mm

## CONSTRUCTION OF PRECISION MECHANICAL PARTS

Our plant, equipped with the latest generation of machining centers, controlled by a CAD-CAM station, is able to build particularly complex high-tech parts in any type of material and respecting the tightest tolerances. The organization of work on two shifts, combined with the versatility of the machinery, allows great timeliness in the production of prototypes or series of products.

DMG Mori-Seiki, Nigata, Okuma, Mazak, Fagima, Doosen, Hass

CAD/CAM

**Control and  
testing**

**Multitasking  
centres**  
for complex  
machining

**Turning centres**  
for machining up to 3000 mm
